realizing a true mobile workforce.

The challenge

The reality is that you're not at your desk in front of a computer all the time. More than likely you are in the field: replacing lightbulbs, performing weekly unit cleanings, checking boilers, and driving residents to medical appointments.

Are staff continually walking back to the office to get new work assignments? Are you printing reams of work orders and schedules? Are you wishing for more accurate time tracking so you can better forecast resource requirements?

There is a better way. TheWorxHub: Mobile Worx.

The solution

TheWorxHub: Mobile Worx app is a comprehensive mobile solution that enables senior living communities to take advantage of TheWorxHub in a mobile environment. Key benefits include:

|	
Instant Visibility	• Dashboard interfaces convey exactly what's going on in your community, from pending requests to incomplete work.
Data Capture	• Capture critical meter readings to ensure resident safety, such as water temperature and emergency generator readings.
Time Tracking	• Justify time spent and maintain accurate records with the built-in job timer.
Remote Work	• Get new work assignments immediately in the field. Look up work details, safety notes, capture completion details, upload photos, log time, and mark tasks as complete.

The visibility you need to stay in-the-loop

Keep an eye on critical information from your Android or Apple iOS device.

- View & accept pending requests and manage all aspects of work orders.
- Reassign work and mark jobs complete.
- Look up work history to identify recurring problems.
- View photos and other files on your phone or tablet.

The Mobile Worx app ensures that you have the data you need to effectively manage unexpected issues when they occur.

Data capture done right

Mobile Worx is constantly saving your data while in the field as it happens, even if you're offline.

- Capture compliance-related water temperature checks or emergency generator readings.
- Accurately track work time and travel time to the job site.
- Instantly know where staff are and what they're working on.

Ultimately, it's all about the residents

At the end of the day, the primary metric for success is whether or not a solution benefits the residents. With Mobile Worx, your workforce can engage with residents in a more meaningful and respectful way. With instant access to permission-to-enter instructions, special resident notes, touch-to-call/email residents, and real-time status on resident work orders, your staff can deliver the best possible service at all times.

Let's talk...

Dude Solutions — and TheWorxHub suite of products — is a leader in the world of senior living operations software, offering a solution that enables easy management of your facility in an accessible, web-based environment.
